

Cut out the "SNOURTH-ometer" or "MEGA SNOURTH-ometer or both. Cut out as many "SNOURTH-iscopes" as you think you may need along the red lines. Make each one a different height. Fold each "SNOURTH-iscopes" along the blue lines and glue the two sides together. Glue the blue rectangular pads to the bottom of the "SNOURTH-iscopes" tabs. This will help them to stand up straight.
