

# The Sundial Primer

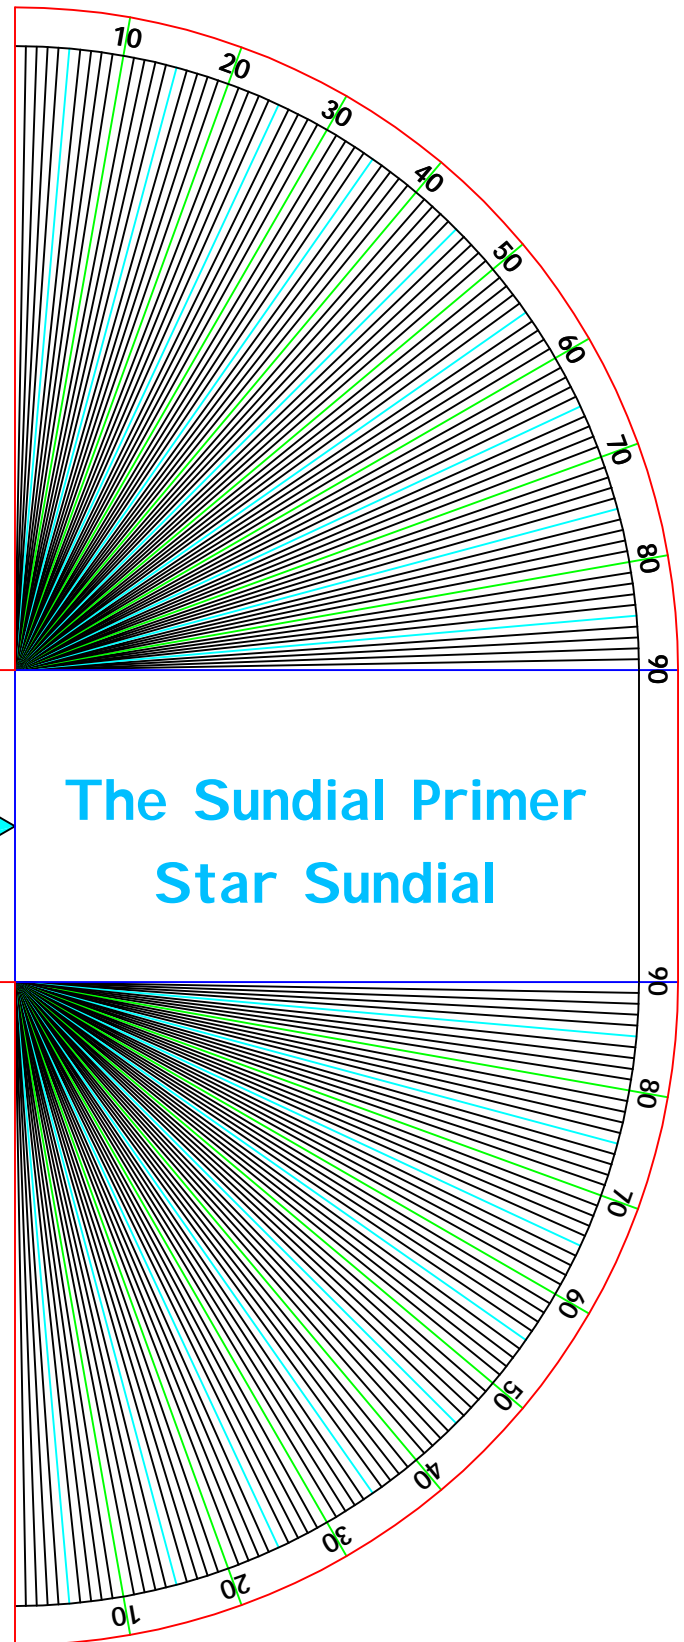

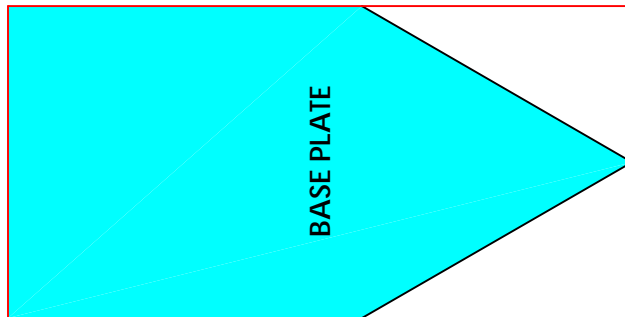

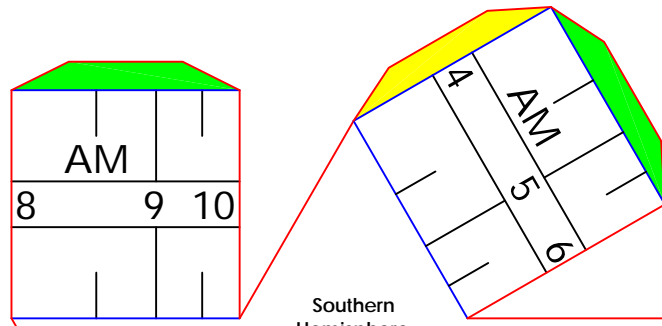

1. Cut the sundial out around the outside following the red lines.
2. Fold back all the tabs and available faces along the blue lines.
3. Glue all the tabs to the inside faces of the sundial.

Optional tab supports for inner corners of star. Glue on the inside.

1. Cut the sundial base out around the outside following the red lines.
2. Fold back along your latitude lines.
3. Cut about 1/4" outside and parallel to the folds. This will make tabs for gluing the base to.
4. Fold back along the remaining blue lines.
5. Fold the tabs and glue them to the back face of the base.
6. Glue the star sundial to the base by matching the cyan coloured areas.
7. Reinforce the base, if necessary, to maintain the correct angle.

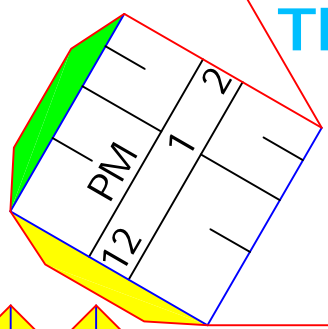

Green tabs - required  
 Yellow tabs - optional  
 Red lines - cut  
 Blue lines - fold
